Configuring SMART™ Settings within Windows 7

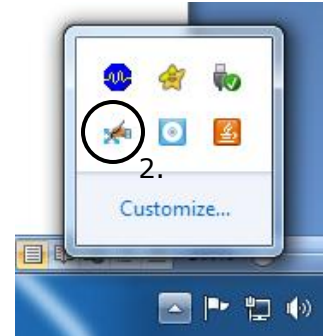

(Do this on any PC; estimated time: < 5 minutes to adjust settings)

Problem:

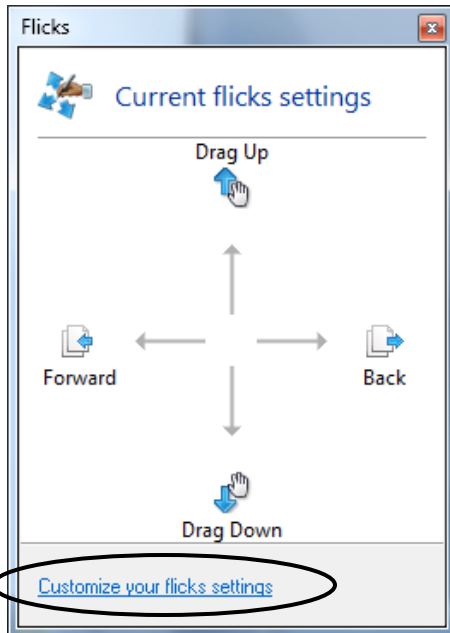

SMART™ objects do not respond to touch or move smoothly within Notebook 10™ software; the entire work area within Notebook 10™ software erratically moves.

Solution: Turn Off “Flicks” and “Panning”

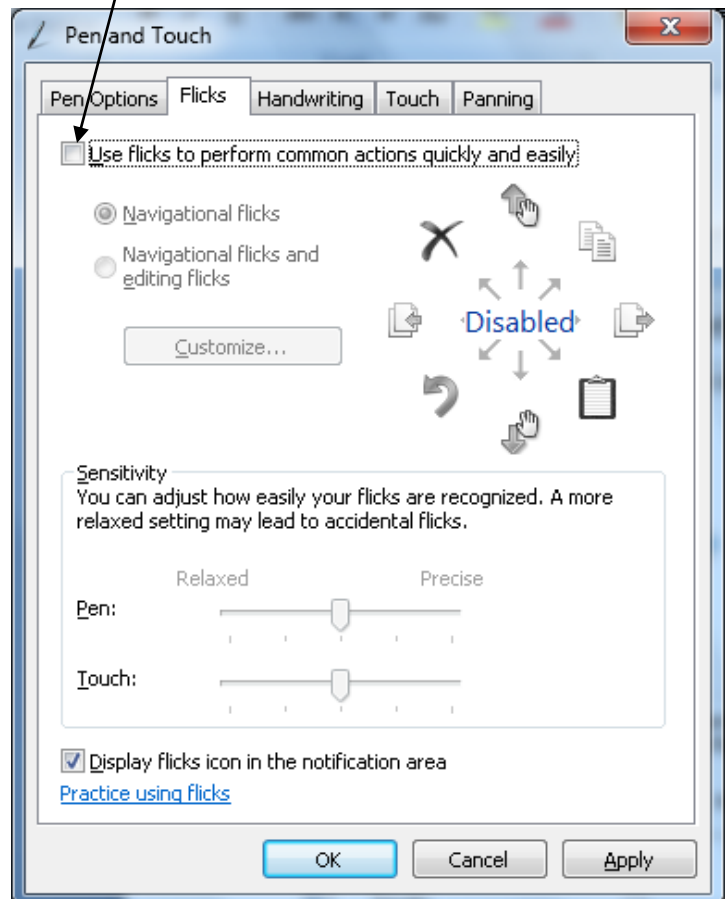

1. Click on the small, white arrow within the Windows Notification Area (bottom, right-hand corner of the desktop).
2. Click the small “flicks” icon: 
3. Then, click the link “Customize your flicks settings.”

1.

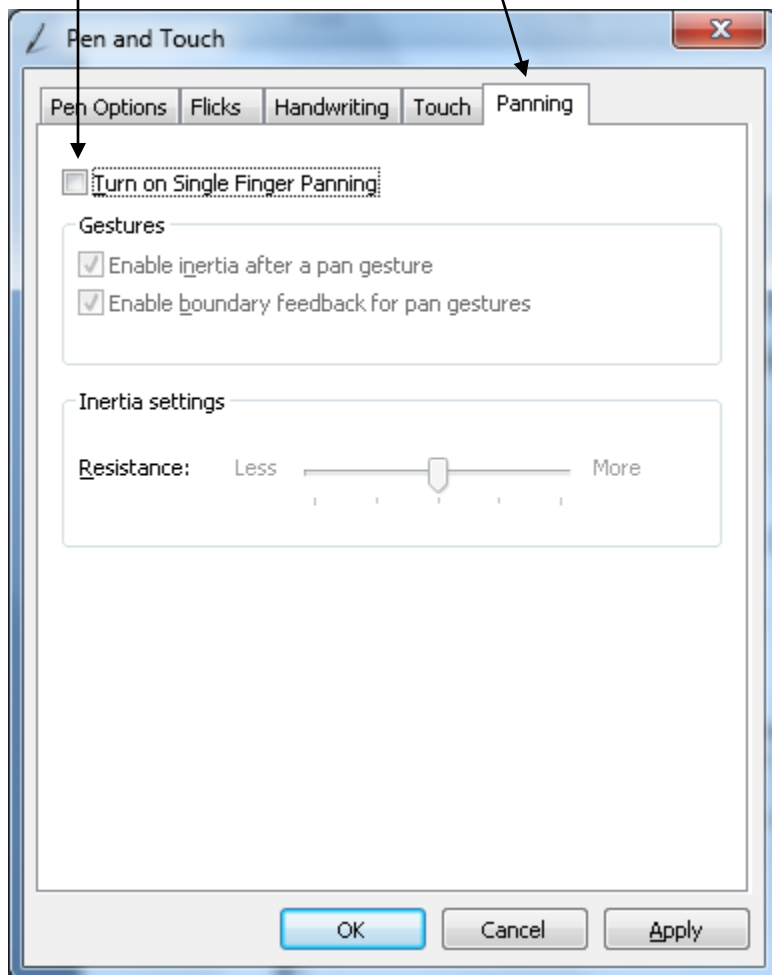

4. Next, **uncheck** the box next to the phrase “Use flicks to perform common actions quickly and easily.”

5. Finally, click on the "Panning" tab.

Uncheck the box next to the phrase "Turn on Single Finger Panning."

Remember, if a pop-up message like the one below appears in the lower, right corner, PLEASE DO NOT CLICK ON IT or launch the firmware update.
