Grade 5th

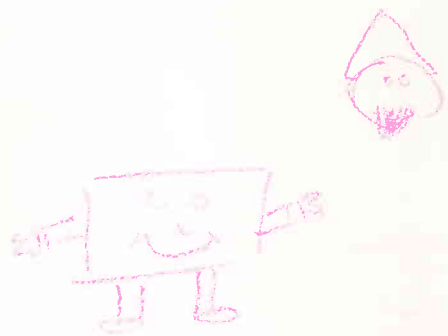

- Long ago in the Kingdom of Squareland, there was a kind Ruler name King Saurus the VI. He and the Royal family were perfect squares. The Kingdom's people were Equilateral Δ 's. All was happy.

- The royal family, all perfect squares has distinct features. All 4 congruent right angles, 2 congruent diagonals, 4 congruent sides, all in all perfect. The triangles with 3 congruent angles, each 60° and supplementary and an altitude that was also as median bisecting the base and divided into \cong sides.

- one day, the queen had a baby. It was alarming, because the baby was a rectangle!! Through him growing up he was hated the whole time and once he was a big rectangle he was banished from the kingdom.

The rectangle - went to a wise old sage ^{circle} who told him about
himself. congruent diagonals, opposing sides \cong and 4 rights. glad to know
that he was just like his family. He hurried home
and was greeted with glee.

The Prince made friends named Trapezoid & Rhombus who were his Royal advisors from another land.

He got married to a girl named Cabela and ^{became king}
lived happily ever after.
